

Team Captains' Proposed Enhancements to Cross Country

- **Request 1** - Female scoring in the current TVXC cross country championship to be based on a female finish position and not overall position which includes men (eg 10th women rather than 110th place in the race)
- **Request 2** - In addition to or an amendment to the current cross-country championship, to drive attendance in higher competition and reward participation on a wider scale.

Option 1 - To hold a separate competition solely for the Hampshire cross country league. With awards based on points scored in 4 out of 5 fixtures, awarding best male/female senior and vest age groups. We also feel that an award/ should be made for any athlete who finishes in the top 10 overall in the league individually

Option 2 – With the above but to also include attendance at one of BBO, County, Southern or national championships

Option 3 – To create a combined cross-country league, which runners would have to participate in 4/5 cross country races through the season, based on a points system used in the club road championship. Runners would have to run at least one race in the TVXC and the Hampshire league. With the Hampshire league hosting a race in Reading this isn't a massive task to ask additional travel for anyone.

Option 4 – With the above combined league but also ask for attendance in either BBO, County, Southern, national cross-country championships, or participation in Southern 6/12 stage

- **Request 3** - Club to purchase a lightweight branded tent suitable for use at a cross country/relay events, and a club coloured new flag, rather than the white mouldy one we use. Throughout the year the current tent is put up many times, lugged around and really does not portray at all the best impression of our club – happy to source and cost.
 - I have asked for a contribution from 2XU, who would pay half of the cost so long as their logo was included
- **Request 4** - Update to club internal email system- that forwards emails to mobile devices. It is impossible to use webmail on the go and reply to emails without using a computer/laptop and logging in.
- **Request 5** - Update to paying for track use payment, some form of block booking an amount of sessions, or a season purchase. To continue keep using the same system but bring it into the current day lifestyle of little cash used. This would still cost the same but remove the frustration for many who don't use cash that much to draw out money ahead of each session and would also reduce the admin around taking the cash.
